
Front End Developer // Technical Lead

Are you an experienced Web Developer looking for career progression?

Then this unique opportunity could be for you. We are seeking an experienced, seriously-talented Web Developer to bring their years of quality front-end development know-how to the table.

And as an aspiring Tech Lead, work closely with our Studio team of designers and developers to help support them in achieving their project outcomes.

Being a part of a leading Melbourne boutique Digital Agency, you'll be involved in providing bespoke, custom web design & web application development, mobile and online marketing solutions to our portfolio of high profile brand clients.

Not only do you work in digital, but you also love coding and all kinds of projects in your own time, too... we get that. So, it's easy for you delivering front and selected back end development work to the highest standard.

It's your focus on database development, web application and CMS module development along with platforms, languages, and frameworks that make you an essential asset in the rapidly expanding digital world.

You'll need to have a minimum of 5 years' experience in a studio or freelance environment, along with a strong web design & development portfolio.

Required skill sets include:

- Advanced knowledge and experience with PHP and an MVC PHP framework
- Strong understanding of native JavaScript and considerable experience with jQuery
- Ability to write clean, documented (where required) and modular code
- Extensive experience and knowledge of CSS3, HTML5, Bootstrap, SASS, and modern web practices
- Ability to interpret API documentation and integrate web services in a variety of formats (XML-RPC, REST, SOAP, etc.)
- Exceptional analytical and problem-solving skills
- Demonstrated track record in client delivery and projects
- Communicating effectively both verbally and written, on a technical level
- Time management and communication skills, with advanced level English as a minimum
- Workflow planning & project management systems (we use Jira)
- History working with GIT and Linux
- Estimating/quoting on development tasks, and
- A passion for all things web/digital!

Desirable:

- Tertiary qualifications in IT / Computer Sciences / Web preferred
- Self-taught or experience with Squiz Matrix, Adobe Experience Manager, SilverStripe, WordPress, Drupal, Magento and others an advantage.

Salary package is negotiable based the experience & skill level you bring to the table. So if you're an all-rounder in the Studio and looking to mentor and lead the team, assisting others to succeed... this role could be perfect for you.

All applications must include:

- Cover letter
- CV outlining experience and skills
- Examples of previous work (Bit Bucket/PDF/URL).

To apply for this challenging role, address your application to our Creative Director, Darryn Thomas & complete our online application form.

[Recruiters please note, we do not use outsourcing partners]
