
Full Stack Developer // Technical Lead

Are you a Web Developer looking for career progression and bring together a great team to give our customers beautiful design and bespoke development? Then this unique opportunity could be for you. We are seeking an experienced, seriously-talented Web Developer to bring their years of full-stack know-how to the table.

About the role

Being part of a leading creative Digital Agency based in Collingwood, Melbourne, you'll be involved in interesting and diverse custom web design & web application projects, mobile and online marketing solutions to our portfolio of high profile brand clients.

With key projects leading up to Christmas, you'll be leveraging your minimum of 5 years' experience in a studio or freelance environment to hit the ground running and deliver our custom development solutions with ease.

And as the Tech Lead, work closely with our Studio team of designers and developers using your exceptional analytical and problem-solving skills to help mentor them in achieving their project outcomes... **is this your thing? Good!**

About you

Not only do you have a passion for all things digital, but you also love coding and all kinds of projects in your own time, too... we get that. So, it's easy for you delivering front and back end development work to the highest standard.

It's your focus on database development, web application and CMS module development along with platforms, languages, and frameworks that make you an essential asset in the rapidly expanding digital world... **are you on board? Great!**

And your ideal skillset

- Advanced knowledge and experience with PHP and an MVC PHP framework
- Strong understanding of native JavaScript and considerable experience with jQuery
- Ability to write clean, documented (where required) and modular code
- Extensive experience and knowledge of CSS3, HTML5, Bootstrap, SASS, and modern web practices
- Ability to interpret API documentation and integrate web services in a variety of formats (XML-RPC, REST, SOAP, etc.)
- Demonstrated track record in client delivery and projects
- History working with GIT and Linux networks
- Tertiary qualifications in IT / Computer Sciences / Web preferred
- Self-taught or experience with SilverStripe, WordPress, Drupal, Magento and others an advantage...**not a problem for you? Perfect!**

So, if you're an all-rounder in the Studio and ready to lead the team and assist others to succeed, let's chat soon... this role could be just what you're looking for! Naturally, your salary package is negotiable based the experience & skills you bring to the table.

All applications must include

- Cover letter
- CV outlining experience and skills
- Examples of previous work (Bit Bucket/PDF/URL).

To apply for this challenging role, address your application to our Creative Director, Darryn Thomas & complete our online application form.

[Recruiters please note, we appreciate your support when needed but we are not using outsourcing partners for this role – thank you!]
